Railroad Station Parking lot
Streets in Pottsville

Tree planting Locations for Jan 2025

Next Meeting: Monday Oct 21, 2024 @ 3:00

Elm zigzag sawfly (*Aproceros leucopoda*) is a recent addition to the growing list of forest health concerns in the eastern US. Native to China, it is capable of feeding on many elm species – leaving a tell-tale zigzag in its wake. The elm zigzag sawfly is capable of defoliating and greatly damaging trees and represents a novel threat to this important genus.
